

# Are you fed up with sky-high energy bills?

Energy bills are all set to increase again, this time by up to 60%. However, there is an alternative and it doesn't cost nearly as much as you think.

GA Flegg can install a low-cost, solar hot water system in your home. By simply converting sunlight into energy, 50-70% of your annual hot water requirements will become virtually free of charge! What's more, you also reduce your CO<sub>2</sub> emissions by up to 0.75 tonnes per year.

## **Solar water heaters are gaining popularity**

It's no wonder that more and more people are turning to solar water heaters. In fact, many developers are now installing solar panels into brand new homes as a matter of course.

For a free, no obligation quote or to find out more, call **GA Flegg** now on **01908 371650** or **07714 463251**
